

Student Assistant (m/f/d) for the project “*Motion analysis using IMU sensors integrated into hearing aids*”

The chair of Machine Learning and Data Analytics at the Friedrich-Alexander University Erlangen-Nuremberg offers a position as Student Assistant (m/f/d) to assist the project “Motion analysis using IMU Sensors integrated into hearing aids”.

The areas of responsibilities include, among other things:

- Supporting data recordings
- Data processing and analysis
- Other projects and research related tasks

Prerequisites

- Experience with time-series data, ideally motion sensors
- Fluently in German (for studies)
- Good Python skills, object-oriented programming

Period and general information

- Starting date: as soon as possible
- End date: open end
- 6-16 working hours per week
- Payment according to remuneration table of FAU
- Applications are open until the position is filled

Please check our webpage for more information on the [research project](#) and the [research group](#).

If you are interested in the position, please send you CV, transcript of records, and a cover letter (max 1 page) by e-mail to: ann-kristin.seifer@fau.de.

Don't hesitate to contact Ann-Kristin Seifer regarding any further questions.
